COLLABORATIVE DEMOCRACY: THE TRANSITION FROM MONEY-DRIVEN TO KNOWLEDGE-BASED SOCIETY

Createspace, United States, 2011. Paperback. Book Condition: New. Revised. 226 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The Industrial Revolution, triggered by the invention of the steam engine and the expansion of the railway network, gradually replaced autocracy with representative democracy, because the complexity of society had risen to a level, which left individual intelligence (i.e. autocracy) no longer capable of effective leadership. The only possible solution was a transition from individual to collective intelligence or from autocracy to democracy. Today, the Humanitarian Revolution, triggered by the invention of the computer and the expansion of the Internet, has turned humanity into a single organism. Understandably, the complexity of this globalised world is now beyond the capacity of collective intelligence to effectively rule, and the only possible solution now is a transition from collective to collaborative intelligence. Collective and collaborative intelligence are different by definition. Collective intelligence is a decision-making mechanism based on a voting system. Collaborative intelligence is a problem-solving mechanism based on the verification of feasible models. The object of this book is to study the co-evolution of economy, social consciousness (culture) and decision-making mechanisms; to explain the downfall of representative democracy; why restoration, repairing, re-engineering etc of representative democracy is impossible; and to outline the inevitable transition from a collective decision-making- to a collaborative problem-solving mechanism in a globalised world.
